

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

EDITORIAL COMMITTEE: S. NEWCOMB, Mathematics; R. S. WOODWARD, Mechanics; E. C. PICKERING, Astronomy; T. C. MENDENHALL, Physics; R. H. THURSTON, Engineering; IRA REMSEN, Chemistry; J. LE CONTE, Geology; W. M. DAVIS, Physiography; O. C. MARSH, Paleontology; W. K. BROOKS, C. HART MERRIAM, Zoölogy; S. H. SCUDDER, Entomology; N. L. BRITTON, Botany; HENRY F. OSBORN, General Biology; H. P. BOWDITCH, Physiology; J. S. BILLINGS, Hygiene; J. McKEEN CATTELL, Psychology; DANIEL G. BRINTON, J. W. POWELL, Anthropology; G. BROWN GOODE, Scientific Organization.

FRIDAY, JUNE 5, 1896.

## CONTENTS:

<i>On the Untechnical Terminology of the Sex-relation in Plants:</i> L. H. BAILEY.....	825
<i>On the Diffusion of Metals:</i> W. C. ROBERTS-AUSTIN.....	827
<i>On the Detection of Glacial Striae in Reflected Light:</i> F. C. SCHRADER.....	830
<i>Occurrence of Uintaite in Utah:</i> GEORGE H. ELDRIDGE.....	830
<i>Ruins of Quiriguá:</i> JOHN R. CHANDLER.....	832
<i>Current Notes on Anthropology:—</i> <i>Primitive Ethnology of France: Palæoliths from Somaliland; Comparative Ethnic Anatomy:</i> D. G. BRINTON.....	833
<i>Notes upon Agriculture and Horticulture:—</i> <i>The American Persimmon; Plum-leaf Spot; Fungicides Increase the Growth of Plants; Vegetable Culture:</i> BYRON D. HALSTED.....	834
<i>Scientific Notes and News:—</i> <i>The Metric System; The Röntgen Rays; The Storage of Water; Crater Lake; General</i> .....	836
<i>University and Educational News</i> .....	840
<i>Discussion and Correspondence:—</i> <i>'Progress in American Ornithology, 1886-'95:'</i> R. W. SHUFELDT, J. A. ALLEN. <i>The Polar Hares of Eastern North America:</i> SAMUEL N. RHOADS. <i>American Polar Hares:</i> C. H. M. <i>The Subject of Consciousness:</i> J. W. POWELL.....	841
<i>Scientific Literature:—</i> <i>Lang's Text-book of Comparative Anatomy:</i> W. H. DALL. <i>Naue's Die Bronzezeit in Oberbayern; Bergen's Current Superstitions:</i> D. G. BRINTON.....	847
<i>Societies and Academies:—</i> <i>Academy of Natural Sciences of Philadelphia:</i> EDW. J. NOLAN. <i>Proceedings of the Torrey Botanical Club:</i> W. A. BASTEDO. <i>Alabama Industrial and Scientific Society:</i> EUGENE A. SMITH.....	850
<i>New Books</i> .....	852

MSS. intended for publication and books, etc., intended for review should be sent to the responsible editor, Prof. J. McKeen Cattell, Garrison-on-Hudson, N. Y.

## ON THE UNTECHNICAL TERMINOLOGY OF THE SEX-RELATION IN PLANTS.

THE modern conception of the sex-relation and the alternation of generations in plants has so changed our point of view respecting the morphologies of various members that an entirely new terminology has recently come into use to express the new-found homologies. At the same time, there is an attempt to restrict or to specialize the use of such age-long words as male and female, sex and the like, when applying them to plants. This part of the new terminology which touches common language is not above criticism, and I wish briefly to advert to it.

It should be said, in the first place, that the original conceptions of sexuality in plants, from Camerarius down to the middle of this century, were borrowed and adapted very largely from analogy with the animal kingdom. The stamens were considered to be male organs of sex and the pistils to be female organs, the idea of the necessity of a conformed sex-member being evidently borrowed from a knowledge of animal morphology. At the present time, however, our conception of the sex-relation of the higher plants is borrowed from a study of the flowerless plants, which, with every reason, are believed to represent a more primitive stage of evolution than the flowering plants. The true significance of the sex-process in plants was first clearly conceived
